

## SKIN Newsletter 2

April 2018

### Welcome to our second Newsletter

The Short supply chain Knowledge and Innovation Network – SKIN aims at stimulating the creation of a collaborative **network** in different EU agriculture sectors through the improvement of knowledge exchange among **European farmers, researchers, practitioners, policy makers and citizens** about **Short Food Supply Chains**.

The interactive and innovative model promoted by SKIN is intended to integrate and share practical knowledge with those players who would benefit the most from it. Do you want to get better insight of good practices in short food supply chain? Please discover the [SKIN good practices repository!](#)

We are now organizing our **4th project meeting in Mechelen** (23-25 April 2018) to discuss about the results obtained till now and to pave the way for the activities ahead of us.

Moreover, in the second period of project activities, we will be focused on **strengthening the network**, whereby, **25 Regional Nodes** will be set up in each country represented by SKIN. Each Node will act as a hub for all SFSC players and as an interactive meeting point supporting knowledge sharing and discussions among actors and stakeholders about innovative solutions in the short food supply chain domain.

You are always welcome to the SKIN community!

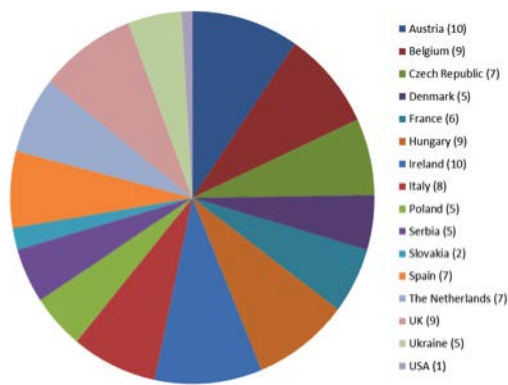

*Efficiently yours,*

*Fedele Colantuono and Prof. Francesco Contò*

## Discovering inspiring short food supply chains practices from Austria

The Short Supply Chain Knowledge and Innovation Network, **SKIN**, continued its discovery trip among local good practices and innovative short food chains stories by meeting the people behind the short food supply chain practices in Austria.

## SKIN Good Practices by country

About 100 good practices have been collected by SKIN consortium representing collective actions, environmental concerns, regional developments related to several food products, thematic models and beyond

## Discovering short food supply chains good practices in urban areas

The Short Supply Chain Knowledge and Innovation Network, **SKIN**, is where good practices and local stories of innovation in the short food chains domain are. This is the place where food plays an essential role in bringing producers and society values on food together.
