Meine Ernte	
Author(s)	Antoine Kieffer
Insert photo or any visual image or diagram e.g. SNA diagram/Word or Image Collage (Optional)	
Choose relevant 'Hot Topics' below:	
SKIN good practice 'Hot Topic(s)'[*] CATEGORY 1	Social sustainability: allowing everyone to have a piece of land to grow vegetables
SKIN good practice 'Hot Topic(s)'[*] CATEGORY 2	Learning and empowerment of consumers
SKIN good practice 'Hot Topic(s)'[*] CATEGORY 4	Efficiency: online management
SKIN good practice 'Hot Topic(s)'[*] CATEGORY 3	
SKIN good practice 'Hot Topic(s)'[*] CATEGORY 4	
<p>Short summary for practitioners in English on the (final or expected) outcomes (1000-1500 characters, word count – no spaces). This summary should be as interesting as possible for farmers/end-users, using a direct and easy understandable language and pointing out entrepreneurial elements which are particularly relevant for practitioners. Research oriented aspects which do not help the understanding of the practice itself should be avoided.</p>	Short description of the 'good practice': Meine Ernte is a german system that allows consumers (especially in cities), to book and rent gardens close to their home and to grow their own vegetables there, without moving to the country.
	Main results/outcomes of the activity (expected or final): Allow german citizens to always have a place where they can grow their own products, and control what the way they grow them.
	The main practical recommendation(s): what would be the main added value/benefit or opportunities to the end-user if the generated knowledge were implemented? How can the practitioner make use of the results? For the consumers: a unique system allowing them to take control of what they consume, for the renters: finding an original way to valorize their land.

Pearls, Puzzles, Proposals?	Pearls: A unique land management system involving citizens and empowering them. Puzzles: if several people share lands back to back, it's actually quite difficult to control the quality of the soil and preserve its integrity depending on the practices of each consumer. Proposal: have a strict control of how the land has been used by the renters
What needs did the 'good practice' respond to?	Empowerment of citizens, better land management
Methodology Used:	Internet
Actors/Stakeholders:	Consumers, land owners
Relevant SKIN Innovation Challenge Workshops(s)? Please specify	5. Consumers and Society
Sectors	Vegetables
Region, Country	Germany
Media attachment (e.g. video) or other attachment (e.g. benchmarking data)?
